

FOR IMMEDIATE RELEASE

**BMR Street Performance K-Member for 2024 S650 Mustangs
KM760- \$719.95**

Decrease front end weight and increase header and turbo clearance in your 2024 S650 Mustang with a Street Performance K-Member from BMR Suspension. Factory k-members are manufactured from stamped steel and are heavy and bulky. Constructed from DOM steel tubing and 3/16" laser-cut mounting plates, BMR's S650 K-Member offers uncompromised strength and durability. The BMR Street Performance K-Member (KM760) retains the use of factory motor mounts but upgrading to BMR Motor Mounts (MM007) is recommended to lower the engine and provide additional clearance. The KM760 is designed to be utilized with either a factory electric steering rack or aftermarket manual steering rack. The BMR Street Performance K-Member is compatible with factory suspension, allowing for the use of factory sway bar mounts and Magneride. Designed specifically for street performance applications, the KM760 provides a significant weight savings with much improved rigidity. Installation time is only 3-4 hours. Available in black hammertone or red powdercoat for long-lasting good looks. Proudly made in the U.S.A.
