

FOR IMMEDIATE RELEASE

**BMR IRS Subframe Support Brace System for S650 Mustang  
CB762 - \$249.95**

Reduce wheel hop and achieve more predictable performance in your S650 Mustang with a Subframe Support Brace System from BMR Suspension. The S650's IRS system was built to appease the average everyday Mustang owner, engineered to be compliant and smooth. Constructed from ¼-inch laser cut steel plate and 1" x 2" boxed tubing, our IRS Subframe Support Brace System provides the improved stiffness and support required for performance applications. Unlike similar systems offered by our competitors, the BMR Subframe Support Brace System (CB762) consists not only of front support braces, but rear support braces as well. These rear supports greatly assist in eliminating wheel hop on the S650. The CB762 also works in conjunction with our Level 2 Cradle Bushing Lockout Kit (CB005) to eliminate cradle movement. BMR has designed the CB762 for street performance, drag racing, and handling applications. Installation time is 1-2 hours. Available in black hammertone or red powdercoat for long-lasting good looks. Proudly made in the U.S.A.
