

FOR IMMEDIATE RELEASE

**BMR Suspension Street Performance Lowering Springs for S650 Mustangs -
SP080—\$219.95**

Improve the cosmetic appeal and increase the handling capabilities of your S650 with Street Performance Lowering Springs from BMR Suspension. Manufactured from chrome silicon high-tensile spring wire, these springs are cold wound on a CNC coiling machine that can adjust the spring diameter in real time to ensure that every spring is exactly the same. These springs will lower your 2024 V8-equipped Mustang and feature a 170 lb/in front and 740 lb/in rear linear spring rate to give you a smooth ride and great looks. The BMR Lowering Springs (SP080) lower the center of gravity to allow the body to stay flat and level in the turns, while remaining soft enough for a comfortable ride on any road. BMR designed the SP080 springs for street performance, but it also works well for the occasional track outing. Like all BMR lowering springs, the SP080 has a LIFETIME guarantee against spring sag. Available in red powdercoat for long-lasting good looks. Installation time is about 3-4 hours. Proudly made in the U.S.A.!
