

FOR IMMEDIATE RELEASE

Caster/Camber Plates for 2011-2014 Mustang, including Shelby GT500

WAK751 - \$209.95

Add caster and camber adjustability, and fix alignment issues on your lowered 2011-2014 Mustang with Caster/Camber Plates from BMR Suspension. The factory alignment adjustability can be insufficient when you lower your S197 Mustang. Manufactured from CNC laser-cut steel plate, BMR's Caster/Camber Plates (WAK751) are designed to add caster and camber adjustability to the Mustang front suspension that is not available from the factory. BMR's Caster/Camber Plates give you a total camber range of 1.75 degrees and are a 100% bolt-on design. The WAK751 also replaces the weak factory strut mount bushings with high-quality, USA-made, Teflon-lined spherical bearings. BMR has designed the WAK751 to correct the alignment on a lowered 11-14 Mustang and GT500 and add aggressive alignment settings for both the street and track. Installation time is about 2 hours. Available in black hammertone or red powdercoat for long lasting good looks. Proudly made in the USA!
