

FOR IMMEDIATE RELEASE

**Level 1 Cradle Bushing Lockout Kit for S550 Mustangs  
CB010 - \$119.95**

Reduce wheelhop, bushing deflection, and cradle movement on your S550 Mustang with a Level 1 Cradle Bushing Lockout Kit from BMR Suspension. Built from 6061-T6 billet aluminum and stainless steel, BMR's CB010 Cradle Bushing Lockout Kit is designed to reduce cradle bushing deflection, which is one of the biggest causes of wheelhop. BMR's Cradle Bushing Lockout Kit (CB010) captures the inner bushing sleeve and outer lip of the bushing cup on the cradle, as well as the bottom portion of the bushings' inner sleeves, reducing movement on any plane. BMR Suspension designed the CB010 Cradle Bushing Lockout Kit for street performance, drag racing, and handling applications. This 100% bolt-on kit uses existing boltholes and hardware, allowing for easy installation with simple hand tools. The kit is designed to work with all S550 Mustangs including convertibles, as well as with other companies' cradle bracing kits. Once installed, the Cradle Bushing Lockout Kit minimizes bushing and cradle deflection with nearly no change in NVH. When performance is a must, rely on BMR Suspension!

BMR Suspension's CB010 Cradle Bushing Lockout Kit is available in black hammertone and red powdercoat for long-lasting good looks. Installation time is 1-2 hours. Proudly made in the U.S.A.! Installation time is about 3-4 hours. Proudly made in the U.S.A.!
