

FOR IMMEDIATE RELEASE

**BMR Suspension Caster Camber Plates for S550 Mustang
CP001 - \$279.95**

Add caster and camber adjustability, and fix alignment issues on your lowered S550 Mustang with Caster/Camber Plates from BMR Suspension. The factory alignment adjustability can be insufficient when you lower your 2015-newer Mustang. Manufactured from CNC, laser-cut steel plate, BMR's CP001 Caster/Camber Plates are designed to add caster and camber adjustability to the S550 Mustang front suspension. BMR also replaces the weak factory strut mount bushing with high-quality US-made, Teflon-lined spherical bearings. The design adds camber and caster adjustability that isn't available from the factory. BMR Suspension designed the CP001 Caster/Camber Plates for street performance, drag race, and handling application. This 100% bolt-on kit use existing boltholes and supplied hardware, allowing for easy installation. BMR's Caster/Camber Plates give you a total camber range of 1.75 degrees. This allows you to correct the alignment on lowered Mustangs and add aggressive alignment settings for both the street and track.

To preview all of BMR's high-performance suspension parts, please visit www.bmrsuspension.com, email sales@bmrsuspension.com, or contact them at BMR Suspension, 928 Sligh Avenue, Seffner, FL 33584, 813-986-9302, Fax: 813-986-8055.
