

FOR IMMEDIATE RELEASE

BMR Suspension Single- and On-Car Adjustable Lower Control Arms for 1979-2004 Ford Mustang

TCA049 – 1979-1998 Single-Adjustable - \$159.95

TCA051 – 1979-1998 On-Car Adjustable - \$259.95

TCA053 – 1999-2004 Single-Adjustable - \$159.95

TCA055 - 1999-2004 On-Car Adjustable - \$259.95

Launching harder, reducing wheel hop, and adding cornering consistency to your 1979-2004 Mustang is easy with lower control arms from BMR Suspension. Stock stamped steel control arms with soft rubber bushings deflect under load and absorb power instead of transferring it to the tires. BMR's polyurethane/rod end, single-adjustable and on-car adjustable tubular control arms are manufactured from heavy-duty 1 5/8-inch DOM steel tubing. This design gives you a strong control arm that greatly improves performance, with the adjustability to fine-tune the rear axle alignment. Greasable, 95-durometer bushings add a solid, more responsive feel over the stock rubber bushings. BMR's bushings are internally fluted, which allows grease to evenly coat the inner sleeve and bushing thrust surfaces. The assembly is completed with heavy-duty Teflon-lined rod ends and CNC-machined rod end spacers. BMR Suspension designed the TCA049, TCA051, TCA053, and TCA055 to work well in street performance, drag race, and handling applications. The heavy-duty construction eliminates control arm flex, giving you much improved repeatability on the street, starting line, or in the corners. BMR's polyurethane bushings are designed to be compliant enough to give you a comfortable ride and absorb NVH, while remaining firm enough to stand up to high loads of any performance environment. The bushings and rod ends easily handle the high compression loads of hard launches and hard acceleration, yet offer plenty of articulation for great handling. These are the perfect upgrade for the enthusiast looking to improve performance at an affordable price, while maintaining acceptable NVH levels and ride quality. When performance is a must, rely on BMR Suspension!
