**Billet Aluminum Watts Link Pivot Upgrade For Fourth Gen F-Body Watts Link  
WL007- \$149.95**

Upgrade to the ultimate in strength and durability with BMR Suspension's billet aluminum center pivot for Fourth Gen GM F-Body Watts Links (WL007). BMR's center pivot is CNC-machined from 6061-T6 billet aluminum and is black anodized for a great looking, durable finish. It uses a double sheer mount to the crossmember with a greasable Delrin bushing for smooth, bind-free movement. The new pivot simply bolts onto your existing Watts Link with supplied hardware. This pivot works with both the rod end and polyurethane configurations. BMR Suspension designed the WL007 to work well for street performance and handling applications. The WL007 is 100-percent bolt-on and requires no cutting or modifying of your existing Watts link. BMR's billet aluminum Watts link pivot retains all of the adjustability found in the WL002 Watts link kit. The billet aluminum construction means reduced weight and increased strength. When performance is a must, rely on BMR Suspension!

To preview all of BMR's high-performance suspension parts, please visit [www.bmrsuspension.com](http://www.bmrsuspension.com), email [sales@bmrsuspension.com](mailto:sales@bmrsuspension.com), or contact them at BMR Suspension, 928 Sligh Ave, Seffner, FL 33584, 813-986-9302, Fax: 813-986-8055.
