

FOR IMMEDIATE RELEASE

BMR Suspension A-arms for 1979-2004 Mustangs
AA034 - \$309.05, AA035 - \$219.95, AA036 - \$319.95
AA040 - \$309.95, AA041 - \$219.95, AA042 - \$319.95

Improve handling and add strength to the front suspension on your 1979-2004 Mustang with a set of standard ball joint A-arms from BMR Suspension. Manufactured from 1.25-inch DOM tubing and laser cut 3/16-inch mounting plates, these A-arms add loads of strength without adding loads of weight. BMR offers three versions of these A-arms—poly bushing arms for stock-style springs, poly bushing arms for coil-overs, and rod end adjustable arms for coil-overs. The polyurethane arms (AA034, AA035, AA040, and AA041) are completed with 95-durometer, internally fluted polyurethane bushings. This gives you a quiet comfortable ride, with big improvements in strength and handling. The rod end arms (AA036 and AA042) feature high-quality, heavy-duty, Teflon-lined rod ends. These give you incredible amounts of strength, with all the articulation needed for great handling and bind-free suspension movement. BMR's stock-style spring cup A-arms (AA034 and AA040) accept factory or stock-style aftermarket springs. This means coil-overs are not required. BMR designed its 1979-2004 Mustang A-arms for street performance, drag race, and handling applications. Available in black hammertone and red powdercoat finishes. Installation time is 3-4 hours.
