

FOR IMMEDIATE RELEASE

BMR Suspension Drag Racing Lower A-Arms for 2011-2014 S197 Mustangs and Shelby GT500s

AA758 - \$609.95

Improve performance and front-end stability on your 2011-2014 S197 Mustang and Shelby GT500 with Lower A-Arms from BMR Suspension! Manufactured from heavy-duty 4130 steel and 6061 aluminum, BMR's Drag Racing Lower A-Arms (AA758) greatly improve steering feel and response for the drag strip. The AA758 eliminates a-arm deflection and improves your vehicle's geometry, allowing you to launch harder. BMR designed the AA758 with a lightweight design that weighs less than stock a-arms, improving performance and lightening your build for the drag strip. BMR's Drag Racing Lower A-Arms also narrow your Mustang's track width by 1.5-inches overall, allowing for quicker response times. The AA758 includes Grade 8 hardware and new 19mm ball joints to give you the best in durability at the track. BMR Suspension designed the AA758 specifically for drag racing applications. Available in red or black hammertone powder coat for long lasting good looks. Installation time is about 2-3 hours. Proudly designed and made in the USA!
