

FOR IMMEDIATE RELEASE

**BMR Suspension Non-Adjustable A-arm Kit for 1967-1969 GM F-Bodies and 1968-1974 GM X-Bodies**

**AAK311 - \$999.95**

Improve handling and front-end stability on your 1967-1969 F-Body and 1968-1974 X-Body with an A-arm Kit from BMR Suspension! Manufactured from 1.25-inch and 1.625-inch DOM tubing and laser-cut steel braces, both the upper and lower A-arms in this kit work to eliminate deflection and improve performance on the road and track. BMR Suspension's Upper A-arms (AAU311) feature dual-offset cross-shafts for minimizing shim stack. BMR's Lower A-arms (AAL311) featured a CNC-machined ball joint cup and Delrin bushings for a more responsive driving feel. BMR's AAK311 Non-Adjustable A-arm Kit increases lateral grip that you need in cornering situations and provides additional header clearance for your vehicle.

BMR has designed the AAK311 for street performance, drag racing, and handling applications. BMR's AAK311 is available in red or black hammertone powder coat for long lasting good looks, and installation time is about 4-5 hours. Proudly designed and made in the USA!
