

FOR IMMEDIATE RELEASE

BMR Suspension Non-Adjustable A-arm Kit for 1970-1981 GM F-Bodies and 1975-1979 GM X-Bodies

AAK322 - \$1019.95

Improve handling and front-end stability on your 1970-1981 F-Body and 1975-1979 X-Body with an A-arm Kit from BMR Suspension! Manufactured from 1.25-inch, 1.5-inch, and 1.525-inch heavy-duty DOM tubing, BMR's Non-Adjustable A-arm Kit (AAK322) works to eliminate deflection and improve performance on the road and track. BMR Suspension's Upper A-arms (AAU322) feature dual-offset cross-shafts for minimizing shim stack. BMR's Lower A-arms (AAL321) featured a CNC-machined ball joint cup and Delrin bushings for a more responsive driving feel. BMR's AAK322 Non-Adjustable A-arm Kit increases lateral grip that you need in cornering situations and provides additional header clearance for your vehicle.

BMR has designed the AAK322 for street performance, drag racing, and handling applications. BMR's AAK322 is available in red or black hammertone powder coat for long lasting good looks, and installation time is about 4-5 hours. Proudly designed and made in the USA!
