

FOR IMMEDIATE RELEASE

**BMR Suspension Adjustable Upper A-Arm and Non-Adjustable Lower A-Arm Kit  
for 1964-1972 GM A-Bodies**

**AAK404 - \$979.95**

Improve handling and front-end stability in your 1964-1972 A-Body with a set of tubular A-Arms from BMR Suspension! Manufactured from 1.25-inch and 1.5-inch DOM tubing and laser cut mounting plates, both arms help to eliminate deflection and improve performance on the road or track. BMR Suspension's Adjustable Upper A-Arms (AAU403) feature shorter tubes and offset cross-shafts to provide a shorter shim stack for lowered vehicles. BMR's Non-Adjustable Lower A-Arms (AAL401) feature a CNC-machined ball joint cup with additional clearance for late model brake kits and Delrin bushings for a more responsive driving feel. BMR's AAK404 A-Arm Kit greatly improves steering feel and response in normal and performance driving. BMR has designed the AAK404 for street performance, drag race, and handling applications. Available in red and black hammertone powdercoat finishes for long-lasting good looks. Installation time is about 4-5 hours. Proudly made in the USA!
