

FOR IMMEDIATE RELEASE

**BMR Suspension Lower A-Arms w/ Delrin Bushings and Spring Pocket
for 1982-1992 GM F-Body**

AAL331 - \$549.95

Improve handling and front-end stability in your 1982-1992 GM F-Body with a set of tubular lower A-arms from BMR Suspension. BMR Suspension's (AAL331) outperforms the factory arms made from bulky stamped steel and high deflection rubber bushings. Manufactured from 1.5" DOM tubing and laser-cut 3/16" mounting plates, the AAL331 lower A-arm features internally-fluted Delrin bushings with easy-to-access grease fittings. The BMR Lower A-arms (AAL331) boast a CNC-machined ball joint cup with additional clearance for late model brake kits. The spring cup design ensures precise spring positioning and proper alignment. BMR's AAL331 lower A-arms significantly improve steering feel and response in normal and performance driving conditions. Upgraded Delrin bushings offer a solid, more responsive feel compared to stock rubber bushings. BMR has designed the AAL331 lower A-arm for street performance, drag race, and handling applications. Available in red and black hammertone powder coat finishes for long-lasting good looks. Installation time is approximately 2-3 hours. Proudly made in the USA!
