

FOR IMMEDIATE RELEASE

BMR Suspension Upper Adjustable A-Arms for 1964-1972 GM A-Bodies

AAU403 - \$519.95

Improve handling and front-end stability in your 1964-1972 A-Body with a set of Upper A-Arms from BMR Suspension! Fabricated from heavy-duty 1.25-inch, 0.095-inch wall DOM tubing with laser-cut, CNC-formed plate steel braces for extra strength, deflection is eliminated with BMR's Adjustable Upper A-Arms (AAU403). BMR's AAU403 is fitted with heavy-duty ball joints and constructed with strong spherical rod ends to improve steering response and feel. BMR uses zinc-plated, chrome-moly, self-lubricating, Teflon-lined rod ends to give you the ultimate strength and reliability on the road and track.

BMR's AAU403 Upper A-Arms eliminate A-arm deflection, greatly improving steering feel and response in normal and performance driving situations. BMR Upper A-Arms are engineered to provide caster and camber adjustability for increased high-speed stability. This gives you the ability to improve geometry and increase lateral grip during cornering situations. BMR Suspension's AAU403 Adjustable Upper A-Arms are available in black hammertone and red powdercoat for long-lasting good looks. Installation time is 3-4 hours. Proudly made in the USA!
