

FOR IMMEDIATE RELEASE

BMR Suspension Weld-On Anti-Roll Bar Kit for 1979-2004 Mustangs

ARB730 - \$299.95

Launch harder and reduce body roll on your 1979-2004 Mustang with an Anti-Roll Bar Kit from BMR Suspension! BMR's Weld-On Anti-Roll Bar Kit (ARB730) allows you to drastically reduce body roll and transfer more power to the ground on launches. Manufactured from 1.25-inch heavy-duty DOM tubing and 0.179-inch laser-cut steel plate, the ARB730 is designed with three-way adjustability to allow for the fine-tuning of your Mustang's suspension. BMR's Anti-Roll Bar Kit greatly increases the sway bar rate of the vehicle, anywhere from 1593 lbs/in to 2724 lbs/in depending on the mounting hole used. The weld-on design of ARB730 ensures durability in a variety of street performance and drag racing applications. The ARB730 is available in red or black hammertone powder coat for long-lasting good looks. Installation time is about 2-3 hours. Proudly designed and made in the USA!
