

FOR IMMEDIATE RELEASE

Bump Steer Kit, Race Version for 1997-2004 C5 Corvettes and 2005-2013 C6 Corvettes, including C6 Z06 and ZR1

BSK551 - \$209.95

Correct bump steer and improve the steering geometry of your C5 and C6 Corvette with a Bump Steer Kit from BMR Suspension! Outer tie rods can wear out over time and increase the amount of bump steer you get while driving. BMR's Bump Steer Kit, Race Version (BSK551) corrects bump steer issues and improves the steering geometry of your Corvette for street and track use. BMR's BSK551 is manufactured from 1.125-inch heavy-duty 6061 aluminum and serves as a direct factory replacement for your Corvette's outer tie rods. BMR's race version of their Bump Steer Kits differ from that of the street version in that the race version offers greater adjustability for a variety of racing applications. For those looking for maximum performance, the BSK551 is the Bump Steer Kit you need!

BMR Suspension has designed the BSK551 for street performance, drag racing, and handling applications. The BSK551 is available black anodized for a durable finish, and installation time is about 1-2 hours. As with all other BMR Suspension products, the BSK551 is proudly designed and made in the USA!

To preview all of BMR's high-performance suspension parts, please visit www.bmrsuspension.com, email sales@bmrsuspension.com, or contact them at BMR Suspension, 1033 Pine Chase Avenue, Lakeland, FL 33815, 813-986-9302, Fax: 813-986-8055.
