

FOR IMMEDIATE RELEASE

BMR Suspension Front Chassis Reinforcement Brace for 1964-1967 GM A-Bodies

CB400 - \$219.95

Significantly stiffen the front chassis of your 64-67 GM A-Body with a chassis brace from BMR Suspension! When racing and everyday driving your A-Body, the front frame and suspension can flex under braking, reducing performance in your chosen application. Manufactured from 1.25-inch DOM steel tubing and heavy-duty steel plate, BMR's Front Chassis Brace (CB400) dramatically increases the rigidity of your A-Body's front suspension and improves handling. The CB400 was designed to be 100% bolt-on, allowing for a substantial performance increase while maintaining a straightforward installation process. BMR's CB400 also reduces unwanted vibration and noise by tightening up the front end of the chassis.

BMR Suspension has designed the CB400 for street performance, drag racing, and handling applications. The CB400 is available in red or black hammertone powder coat for long lasting good looks, and installation time is about 1 hour. As with all other BMR Suspension products, the CB400 is proudly designed and made in the USA!

To preview all of BMR's high-performance suspension and chassis parts, please visit www.bmrsuspension.com, email sales@bmrsuspension.com, or contact them at BMR Suspension, 1033 Pine Chase Avenue, Lakeland, FL 33815, 813-986-9302, Fax: 813-986-8055.
