

FOR IMMEDIATE RELEASE

**BMR Suspension Front and Rear Control Arm Delrin Bushing Kit for 1997-2004
C5 Corvettes and 2005-2013 C6 Corvettes**

CBK550 - \$679.95

Reduce wheel hop and add cornering consistency to your C5 and C6 Corvette with a Control Arm Bushing Kit from BMR Suspension! BMR's Front and Rear Control Arm Bushing Kit (CBK550) is comprised of internally-fluted, greaseable Delrin bushings with 6061-aluminum inner sleeves to greatly increase the suspension control of your vehicle. The CBK550 replaces the factory upper and lower control arm bushings on the front and rear of your Corvette, eliminating control arm bushing deflection during normal and aggressive maneuvering. By replacing the OE soft rubber bushings, BMR's CBK550 is also able to significantly reduce wheel hop and increase the stability of your Corvette on the street and track.

BMR has designed the CBK550 for street performance, drag racing, and handling applications. BMR's CBK550 is available in black for a durable finish, and installation time is about 5-6 hours. BMR also offers the front bushings (CBK551, \$479.95) and rear bushings (CBK552, \$229.95) separately. As with all BMR Suspension products, the CBK550 is proudly designed and made in the USA!
