

FOR IMMEDIATE RELEASE

**BMR Suspension Front and Rear Control Arm Delrin Bushing Kit for  
2006-2013 Corvette Z06s and 2009-2013 Corvette ZR1s**

**CBK560 - \$949.95**

Reduce wheel hop and add cornering consistency to your C6 Corvette Z06 and ZR1 with a Control Arm Delrin Bushing Kit from BMR Suspension! BMR's Front and Rear Control Arm Bushing Kit (CBK560) is comprised of internally-fluted, greaseable Delrin bushings with 6061-aluminum inner sleeves to greatly increase the suspension control of your vehicle. The CBK560 replaces the factory upper and lower control arm bushings on the front and rear of your Corvette Z06/ZR1, eliminating control arm bushing deflection during normal and aggressive maneuvering. By replacing the OE soft rubber bushings, BMR's CBK560 is also able to significantly reduce wheel hop and increase the stability of your Corvette Z06/ZR1 on the street and track.

BMR has designed the CBK560 for street performance, drag racing, and handling applications. BMR's CBK560 is available in black for a durable finish, and installation time is about 5-6 hours. BMR also offers the front bushings (CBK551, \$479.95) and rear bushings (CBK562, \$499.95) separately. As with all BMR Suspension products, the CBK560 is proudly designed and made in the USA!
