

FOR IMMEDIATE RELEASE

**BMR Suspension Front and Rear Control Arm Delrin Bushing Kit for 2014-2019
C7 Corvettes**

CBK570 - \$959.95

Reduce wheel hop and add cornering consistency to your C7 Corvette with a Control Arm Bushing Kit from BMR Suspension! BMR's Front and Rear Control Arm Bushing Kit (CBK570) is comprised of internally-fluted, greaseable Delrin bushings with 6061-aluminum inner sleeves to help greatly increase the suspension control of your Corvette. The CBK570 replaces the factory upper and lower control arm bushings on the front and rear of your Corvette, eliminating control arm bushing deflection during normal and aggressive maneuvering. By replacing the OE soft rubber bushings, BMR's CBK570 is also able to significantly reduce wheel hop and increase your Corvette's stability on the street and track.

BMR has designed the CBK570 for street performance, drag racing, and handling applications. BMR's CBK570 is available in black for a durable finish, and installation time is about 5-6 hours. BMR also offers the front bushings (CBK571, \$489.95) and rear bushings (CBK572, \$499.95) separately. As with all BMR Suspension products, the CBK570 is proudly designed and made in the USA!
