

FOR IMMEDIATE RELEASE

**Delrin Vertical Link Bushing Kit for 2020-2022 Mustang GT500, 2024 S650
Mustang**

CBK764 - \$89.95

Launching harder, reducing wheel hop, and adding cornering consistency to the 2020-2022 Mustang GT500 and S650 Mustang is easy with a Delrin bushing kit for factory vertical links from BMR Suspension. Stock soft rubber bushings deflect under load and absorb power instead of transferring it to the tires. BMR's Delrin Bushing Kit (CBK764) are CNC-machined. This bushing design produces a strong vertical link that greatly improves performance with zero deflection. BMR Suspension designed the CBK764 to excel in street performance, drag race, and road race applications. The stock vertical link bushings flex under cornering loads, producing inconsistent handling characteristics. The CBK764's heavy-duty construction eliminates vertical link bushing flex, allowing for much improved repeatability on the street, starting line, or in the corners. BMR's Delrin bushings are designed to solidly link the spindle to the lower control arm, eliminate deflection and wheel alignment changes. BMR's lightweight Delrin will stand up to high loads of any performance environment. These are the perfect upgrade for the enthusiast looking to greatly improve performance without NVH levels being a concern. BMR Suspension's CBK764 Delrin bushing kit are black for long-lasting good looks. Installation time is about 1 hour. Proudly made in the U.S.A.
