

FOR IMMEDIATE RELEASE

**Radius Rod Bearing Kit for S650 Mustangs  
CBK772 - \$169.95**

Improve steering response and add cornering consistency to your S650 Mustang with a Radius Rod Bearing Kit from BMR Suspension. Soft rubber bushings deflect under load and absorb power instead of transferring it to the tires. Heavy-duty, 1-inch spherical bearings in BMR's Radius Rod Bearing Kit (CBK772) eliminate front radius rod bushing deflection. This kit includes CNC-machined bearing cups that replace the factory rubber bushings. CNC-machined billet aluminum spacers complete the assembly, allowing for a perfect fit and increased performance for any driving style. The CBK772 reduces front alignment changes during aggressive cornering and improves repeatability in a variety of applications. BMR's Radius Rod Bearing Kit improves steering feel and stability and is designed for street performance, drag racing, and road racing applications. The BMR Radius Rod Bearing Kit (CBK772) is available black-anodized for long-lasting good looks. Installation time is about 3-4 hours. Proudly designed and made in the USA!
