

FOR IMMEDIATE RELEASE

**BMR Suspension Driveshaft Safety Loop for 2007-2014 Shelby GT500  
DSL020 - \$109.95**

Protect your 2007-2014 Shelby GT500, while complying with NHRA safety rules with a Driveshaft Safety Loop from BMR Suspension. Built from 1/4-inch laser-cut CNC-formed plate steel, BMR's DSL020 Driveshaft Safety Loop bolts-on using OE mounting holes from the factory transmission mount. The two-piece design is simple to install and does not require the removal of the driveshaft. This design gives you a solidly mounted loop that will stay in place should a driveshaft or transmission failure occur, keeping it from ripping through the floor and injuring the driver, or digging into the track. BMR designed the DSL020 for street, drag race, and top speed applications. A Driveshaft Safety Loop is cheap insurance to protect your investment and provide peace-of-mind whether you are at the track or on the street. When performance is a must, rely on BMR Suspension!
