

FOR IMMEDIATE RELEASE

**2008-2017 Dodge Challenger Adjustable Sway Bar End Link Kit
ELK110 - \$269.95**

Reduce sway bar deflection and improve handling with adjustable sway bar end links for the 2008-2017 Dodge Challenger from BMR Suspension. Manufactured from CNC-machined billet aluminum, the end links include heavy-duty, Teflon-lined rod ends. The BMR Adjustable Front and Rear End Link Kit (ELK110) is designed to resist deflection, giving you the full potential of the sway bar. BMR designed the ELK110 for street performance, autocross, and road race applications. The adjustable links give you the ability to correct sway bar geometry and working angles on lowered Challengers and cars with adjustable sway bars. The adjustability also allows you to add preload and fine-tune the suspension for specific track conditions. Front and rear end links are also available individually (ELK111 front, ELK112 rear). Available in a durable black anodized finish for long-lasting good looks. Installation time is about 2 hours. Proudly made in the U.S.A.!
