

FOR IMMEDIATE RELEASE

**BMR Suspension Double Adjustable Front Lower Control Arms for
2016-2024 Chevy Camaros**

FLC363 - \$329.95

Minimize control arm flex and improve durability on your 6th Gen Chevy Camaro with a set of Front Lower Control Arms from BMR Suspension! Factory aluminum control arms utilize soft rubber bushings that are great for comfort, but cause major deflection under performance conditions. BMR's Front Lower Control Arms (FLC363) replace the factory front radius rod arms on your Camaro to minimize flex and improve durability. The FLC363 is manufactured from heavy-duty 1-inch DOM steel tubing and utilizes Teflon-lined rod ends to improve repeatability and eliminate bushing deflection. BMR's FLC363 also benefits from its rod end design by being double adjustable, allowing for adjustments to be made based on performance needs. For those looking for better repeatability in the corners and under braking, BMR's FLC363 is the upgrade you need.

BMR Suspension has designed the FLC363 for street performance, drag racing, and road racing applications. The FLC363 is available in red or black hammertone powder coat for long lasting great looks, and installation takes about 1-2 hours. As with all BMR Suspension products, the FLC363 is proudly designed and manufactured in the USA!

To preview all of BMR's high-performance suspension parts, please visit www.bmrsuspension.com, email sales@bmrsuspension.com, or contact them at BMR Suspension, 1033 Pine Chase Avenue, Lakeland, FL 33815, 813-986-9302, Fax: 813-986-8055.
