

FOR IMMEDIATE RELEASE

BMR Suspension Non-Adjustable Lower Control Arms for 2021-2024 Broncos

LCA1860 - \$419.95

Add durability and suspension control to your 6th Gen Bronco with lower control arms from BMR Suspension! Stock control arms with soft rubber bushings can be weak and deflect under load, making them a subpar option for when you want to improve your Bronco's performance on the street and when off-roading. Designed from 1.625-inch DOM steel tubing, BMR's Non-Adjustable Lower Control Arms (LCA1860) dramatically reduce lower control arm flex and help you get better traction on the street and when off-roading. The LCA1860 utilizes high durometer polyurethane bushings to reduce deflection and minimize NVH increases on your build. These lower control arms are the perfect upgrade for those looking to maximize performance and reduce lower control arm deflection.

BMR Suspension has designed the LCA1860 to improve the performance of your Bronco on the street and in off-roading applications. The LCA1860 is available in red or black hammertone powder coat for long lasting good looks, and installation time is about 1-2 hours. As with all other BMR Suspension products, the LCA1860 is proudly designed and made in the USA!

To preview all of BMR's high-performance suspension and chassis parts, please visit www.bmrsuspension.com, email sales@bmrsuspension.com, or contact them at BMR Suspension, 1033 Pine Chase Avenue, Lakeland, FL 33815, 813-986-9302, Fax: 813-986-8055.
