

FOR IMMEDIATE RELEASE

BMR Suspension Double Adjustable Lower Control Arms for 2021-2025 Broncos

LCA1864 - \$569.95

Add durability and suspension control to your 6th Gen Bronco with lower control arms from BMR Suspension! Stock control arms with soft rubber bushings can be weak and deflect under load, making them a subpar option for when you want to improve your Bronco's performance on the street and off-roading. Designed from 1.625-inch DOM steel tubing, BMR's Double Adjustable Lower Control Arms (LCA1864) utilize heavy-duty, Teflon-lined rod ends to eliminate bushing deflection. The LCA1864 is designed to dramatically reduce lower control arm flex and add rigidity to your Bronco's suspension. The double adjustable design allows you to dial in pinion angle for optimal driveline, making these lower control arms the ideal upgrade for those looking to take their Bronco's off-roading capabilities to the next level.

BMR Suspension has designed the LCA1864 for street performance and off-roading applications. The LCA1864 is available in red or black hammertone powder coat for long lasting good looks, and installation time is about 1-2 hours. As with all BMR Suspension products, the LCA1864 is proudly designed and made in the USA!
