

FOR IMMEDIATE RELEASE

**BMR Suspension Non-Adjustable Rear Lower Control Arms
for 2016-2024 Chevy Camaros**

LCA361 - \$189.95

Eliminate lower control arm flex on your 6th Gen Camaro with Rear Lower Control Arms from BMR Suspension! Stock stamped steel control arms with soft rubber bushings deflect under load and absorb power instead of transferring it to the tires. Manufactured from heavy-duty 2-inch square steel tubing, BMR's Rear Lower Control Arms (LCA361) feature a non-adjustable design that is intended for use with a coil over set up. The LCA361 eliminates lower control arm flex on the rear of your Camaro and increases suspension control, improving your performance on the track and street. By upgrading to BMR's LCA361 Rear Lower Control Arms, you are taking the next step to greater performance on your coil over-equipped Camaro!

BMR has designed the LCA361 for street performance, drag racing, and handling applications. BMR's LCA361 is available in red or black hammertone powder coat for long lasting good looks, and installation time is about 2-3 hours. As with all BMR Suspension products, the LCA361 is proudly designed and made in the USA!

To preview all of BMR's high-performance suspension parts, please visit www.bmrsuspension.com, email sales@bmrsuspension.com, or contact them at BMR Suspension, 1033 Pine Chase Avenue, Lakeland, FL 33815, 813-986-9302, Fax: 813-986-8055.
