

FOR IMMEDIATE RELEASE

BMR Suspension Single Adjustable Lower Trailing Arms for 2015-2019 Cadillac CTS-Vs

LTA631 - \$159.95

Minimize control arm flex and reduce deflection on your 3rd Gen Cadillac CTS-V with lower trailing arms from BMR Suspension! Stock stamped steel trailing arms with soft rubber bushings can be weak and deflect under load, making them a subpar option for when you want to take your CTS-V racing or improve street performance. Designed from heavy-duty 1.25-inch DOM steel tubing, BMR's Single Adjustable Lower Trailing Arms (LTA631) eliminate trailing arm flex and reduce deflection. The LTA631 utilizes a chromoly, self-lubricating, Teflon-lined rod end to add adjustability to your suspension build. These Lower Trailing Arms are the perfect upgrade for those looking to maximize performance and add cornering consistency to their builds.

BMR Suspension has designed the LTA631 for street performance, drag racing, and road racing applications. The LTA631 is available in red or black hammertone powder coat for long lasting good looks, and installation time is about 1-2 hours. As with all other BMR Suspension products, the LTA631 is proudly designed and made in the USA!
