

FOR IMMEDIATE RELEASE

**BMR Suspension Motor Mount Kit with Solid Bushings for  
2015-2019 Cadillac CTS-Vs and 2016-2024 Chevy Camaros**

**MM362 - \$299.95**

Eliminate engine deflection and improve throttle response times on your 3<sup>rd</sup> Gen Cadillac CTS-V and 6<sup>th</sup> Gen Chevy Camaro with a Motor Mount Kit from BMR Suspension! Factory motor mounts are great for providing a comfortable ride, but do little to eliminate engine deflection. This results in lackluster performance when you need it most on the street and track. BMR's Motor Mount Kit (MM362) includes solid 6061 billet aluminum bushings to eliminate engine deflection, improving the performance of your V8-equipped CTS-V and Camaro. BMR's MM362 is manufactured from 1.75-inch DOM steel tubing and includes Grade 8 hardware to improve throttle response and increase clearance for custom headers and turbo kits. Designed to work with any power level, the MM362 is 50% lighter than the stock engine mounts, allowing you to increase performance and shave front-end weight in the process.

BMR has designed the MM362 for max effort street performance, drag racing, and handling applications. BMR's MM362 is available in red or black hammertone powder coat for long lasting good looks, and installation time is about 2-3 hours. As with all BMR Suspension products, the MM362 is proudly designed and made in the USA!
