

FOR IMMEDIATE RELEASE

**BMR Suspension Polyurethane Motor Mount Kit for C7 Corvettes
MM570 - \$179.95**

Reduce engine movement and improve throttle response on your 2014-2019 Corvette with a Polyurethane Motor Mount Kit from BMR Suspension. The factory mounts are designed to absorb noise and vibration for a smooth ride, but do little for performance. Formed from 3/16-inch laser cut steel plate and 95-durometer polyurethane bushings, our C7 motor mounts offer uncompromised strength and rigidity. The BMR Polyurethane Motor Mount Kit (MM570) drastically decreases engine movement by replacing the soft rubber bushings with stiffer polyurethane bushings with a minor change in NVH. The MM570 Polyurethane bushings also allow the engine to respond quicker than the factory rubber bushings. Our C7 Corvette Polyurethane Motor Mount Kit is a direct factory replacement and includes both upper and lower mounts to maintain factory engine height. BMR has designed the MM570 for street performance, drag racing, and handling applications. Installation time is about 2-3 hours. Available in black hammertone or red powdercoat for long-lasting good looks. Proudly made in the USA!
