

FOR IMMEDIATE RELEASE

**BMR Suspension Delrin Motor Mount Kit for C7 Corvettes
MM571 - \$209.95**

Reduce engine movement and improve throttle response on your 2014-2019 Corvette with a Delrin Motor Mount Kit from BMR Suspension. Factory mounts are designed to absorb noise and vibration for a smooth ride, but do little for performance. Formed from 3/16-inch laser cut steel plate and Delrin bushings, our C7 motor mounts offer uncompromised strength and rigidity. The BMR Delrin Motor Mount Kit (MM571) eliminates engine movement by replacing the soft rubber bushings that contribute to deflection. The MM571 solid motor mounts also allow the engine to respond quicker than mounts with rubber or polyurethane bushings. Our C7 Corvette Delrin Motor Mount Kit is a direct factory replacement and includes both upper and lower mounts to maintain factory engine height. BMR has designed the MM571 for street performance, drag racing, and handling applications. Installation time is about 2-3 hours. Available in black hammertone or red powdercoat for long-lasting good looks. Proudly made in the USA!
