

FOR IMMEDIATE RELEASE

**BMR Suspension Non-Adjustable Panhard Rod for 2021-2025 Broncos**

**PHR1860 - \$199.95**

Minimize bushing deflection and improve performance on your 6<sup>th</sup> Gen Bronco with a Panhard Rod from BMR Suspension! Stock Panhard rods with soft rubber bushings can be weak and allow for excessive deflection in hard off-roading situations. Manufactured from heavy-duty 1.5-inch DOM steel tubing, BMR's Non-Adjustable Panhard Rod (PHR1860) properly maintains alignment of the rear axle to control side-to-side movement and dramatically reduce Panhard rod deflection. The PHR1860 utilizes greaseable, 95-durometer polyurethane bushings to minimize bushing deflection and improve the handling and performance of your Bronco. BMR's Non-Adjustable Panhard Rod is a great upgrade for those looking to take the next step in their off-roading capabilities.

BMR Suspension has designed the PHR1860 for off-roading and street performance applications. The PHR1860 is available in red or black hammertone powder coat for long lasting good looks, and installation time is about 1-2 hours. As with all other BMR Suspension products, the PHR1860 is proudly made in the USA!
