

FOR IMMEDIATE RELEASE

## **BMR Suspension On-Car Adjustable Panhard Rod for 2021-2025 Broncos**

**PHR1862 - \$339.95**

Minimize bushing deflection and add suspension control to your 6<sup>th</sup> Gen Bronco with a Panhard Rod from BMR Suspension! Stock Panhard rods with soft rubber bushings can be weak and allow for excessive deflection in hard off-roading situations. Manufactured from heavy-duty 1.5-inch DOM steel tubing, BMR's On-Car Adjustable Panhard Rod (PHR1862) properly maintains alignment of the rear axle to control side-to-side movement and dramatically reduce Panhard rod deflection. The PHR1862 utilizes an on-car adjustable design that gives you greater suspension control over your Bronco during off-roading adventures. In addition, BMR's On-Car Adjustable Panhard Rod uses greaseable, 95-durometer polyurethane bushings to minimize bushing deflection and improve the handling and performance of your Bronco. For those looking for adjustability to dial in their suspension needs when off-roading their Bronco, the PHR1862 is the perfect upgrade for you!

BMR Suspension has designed the PHR1862 for off-roading and street performance applications. The PHR1862 is available in red or black hammertone powder coat for long lasting good looks, and installation time is about 1-2 hours. As with all other BMR Suspension products, the PHR1862 is proudly designed and made in the USA!
