

FOR IMMEDIATE RELEASE

BMR Suspension Bolt-on Parachute Mount for C7 Corvettes

PM570 - \$459.95

Stop quicker and keep the stock appearance of your drag-oriented 2014-2019 Corvette with a Parachute Mount from BMR Suspension! Manufactured from 1.625-inch, 0.095-wall and 1-inch, 0.120-inch wall DOM tubing and laser-cut steel plate, BMR's Bolt-on Parachute Mount (PM570) is strong and durable for drag racing conditions. BMR Suspension designed its PM570 for high-powered street Corvettes that see the track regularly, giving it a nonpermanent design that allows the mount to be easily removed after being raced for the day. The PM570 installs behind the license plate of your C7, allowing for the rear bumper to stay on during use. BMR's Bolt-on Parachute Mount requires no cutting or fabrication on your Corvette to be compatible and works with almost all available parachutes on the market.

BMR Suspension designed the PM570 for drag racing and top speed applications. BMR's PM570 is available in red or black hammertone powder coat for long lasting good looks, and installation time is about 3-4 hours. Proudly designed and made in the USA!
