

FOR IMMEDIATE RELEASE

BMR Non-Adjustable Rear Suspension Kits for 1978-1987 G-Body

RSK466 - \$359.95

RSK460 - \$379.95

Launching harder, reducing wheel hop, and adding cornering consistency to your 1978-1987 GM G-body is easy with a Rear Suspension Kit from BMR Suspension. Stock stamped steel control arms with soft rubber bushings deflect under load and absorb power instead of transferring it to the tires. Manufactured from heavy-duty DOM steel tubing, the BMR control arms and reinforcement braces provide maximum strength and durability. The upper and lower control arms come with greasable, 95-durometer polyurethane bushings that add a solid, more responsive feel over the stock rubber bushings. BMR's polyurethane, non-adjustable Rear Suspension Kit (RSK466) consists of non-adjustable lower control arms, non-adjustable upper control arms, and control arm reinforcement braces. BMR's polyurethane, non-adjustable Rear Suspension Kit (RSK460) consists of non-adjustable lower control arms and non-adjustable upper control arms. A BMR Adjustable Rear Suspension Kit (RSK466/RSK460) is the perfect upgrade for the enthusiast looking to greatly improve performance, while maintaining acceptable NVH levels and ride quality. BMR has designed its Non-Adjustable Rear Suspension Kits to work well in street performance, drag race, and road race applications. Available in black hammertone or red powdercoat for long-lasting good looks. Installation time is 4-5 hours. Proudly made in the U.S.A.
