

FOR IMMEDIATE RELEASE

**BMR Suspension Front and Rear Sway Bar Kit for 1982-1992 F-Body**

**SB330 - \$539.95**

Improve handling, reduce body roll, and increase cornering stability on your 3<sup>rd</sup> Gen F-Body with a Non-Adjustable Sway Bar Kit from BMR Suspension! Designed from 35mm (front) and 25mm (rear) DOM steel tubing, BMR sway bars are cold formed to better resist torsional fatigue and retain "memory" far longer than conventional hot-formed bars. BMR's Sway Bar Kit (SB330) gives you 129% (front) and 149% (rear) increase in sway bar rate over the stock bars, reducing body roll and improving handling. BMR Suspension designed these sway bars for street performance, autocross, and road racing applications. The SB330 is non-adjustable for a fixed design. The included sway bars attach to the car with 88-durometer polyurethane bushings, greatly reducing the deflection seen in rubber bushings. Thrust washers locate the sway bars, eliminating lateral movement under aggressive cornering. The front (SB331) and rear (SB003) sway bars are also available separately. Installation time is 2-3 hours. Available in black hammertone or red powdercoat. Proudly made in the U.S.A.!
