

FOR IMMEDIATE RELEASE

**BMR Suspension Front Adjustable Sway Bar Kit for 1982-1992 F-Body**

**SB334 - \$379.95**

Improve handling, reduce body roll, and increase cornering stability with an adjustable front sway bar kit for the Third Gen F-Body from BMR Suspension. Manufactured from 38mm DOM steel tubing, the BMR sway bars are cold formed to better resist torsional fatigue and retain "memory" far longer than conventional hot-formed bars. The BMR Front Adjustable Sway Bar Kit (SB334) gives you a 165%-189% increase in sway bar rate over the stock bars, reducing body roll and improving handling. BMR Suspension designed these adjustable sway bars for street performance, autocross, and road race applications. The SB334 features two positions of adjustability for fine tuning. They attach to the car with 88-durometer polyurethane bushings, greatly reducing the deflection seen in rubber bushings. Thrust washers locate the sway bars, eliminating lateral movement under aggressive cornering. Installation time is 1-2 hours. Available in black hammertone or red powdercoat. Proudly made in the U.S.A.!
