

FOR IMMEDIATE RELEASE

BMR Suspension Non-Adjustable Rear Sway Bar Kit for 1964-1972 GM A-Bodies

SB402 - \$169.95

Improve handling, reduce body roll, and increase cornering stability on your 1964-1972 A-Body with a Non-Adjustable Rear Sway Bar Kit from BMR Suspension! Manufactured from heavy-duty, solid 1-inch bar stock, BMR sway bars are cold formed to better resist torsional fatigue and retain 'memory' far longer than conventional hot-formed bars. The BMR Non-Adjustable Rear Sway Bar Kit (SB402) gives you a 200% increase in sway bar rate over the stock bars, reducing body roll and improving handling. The SB402 was designed to attach to your A-Body using the factory sway bar mounts, allowing for more control and better handling. BMR Suspension designed the SB402 for street performance, autocross, and road racing applications and is available in red or black hammertone powdercoat for long-lasting good looks. Installation time is about 1-2 hours. Proudly made in the USA!
