

FOR IMMEDIATE RELEASE

BMR Suspension Bolt-On Subframe Connector Kit for 1974-1981 F-Bodies

SFC321 - \$339.95

Reduce chassis flex and increase handling on your 1974-1981 F-Body with a subframe connector kit from BMR Suspension! In performance scenarios, the F-Body chassis can flex dramatically, even with mild amounts of torque and horsepower. BMR Suspension's Bolt-On Subframe Connector Kit (SFC321) is manufactured from 2 x 2 – inch, .120-inch wall square steel tubing and 0.125-inch laser-cut steel plate, making it considerably stronger than other subframe connectors on the market. The SFC321 utilizes a 100% bolt-on design and includes all necessary brackets and Grade 8 hardware. BMR's Bolt-On Subframe Connector Kit dramatically increases chassis stiffness, improving handling and performance. BMR has designed the SFC321 for street performance, drag racing, and handling applications. Available in red or black hammertone powdercoat for long-lasting good looks. Installation time is about 1-2 hours. Proudly designed and made in the USA!
