

FOR IMMEDIATE RELEASE

**BMR Suspension 3” Drop Rear Lowering Leaf Springs with Install Kit for
1967-1969 GM F-Bodies and 1968-1974 GM X-Bodies**

SP317 - \$599.95

Improve handling and give your 67-69 F-Body and 68-74 X-Body an aggressive stance with Lowering Leaf Springs from BMR Suspension! With a three-leaf design that is 2.5-inches wide and has 3-inches of free arch, BMR’s 3” Drop Rear Lowering Leaf Springs with Install Kit (SP317) lowers the rear of your classic performance vehicle by 3 inches. BMR’s SP317 features a 190 lb/in spring rate and includes new rubber bushings, giving you a smooth ride without having to worry about compromising NVH levels. The SP317 also includes an installation kit with new axle pads and U-bolts that replaces the old, worn-out hardware while installing your new lowering leaf springs. This lowering leaf spring kit is the perfect solution for those looking to replace their vehicle’s old, rusty leaf springs and improve its handling and ride quality. Pair the SP317 with a set of BMR front lowering springs for an even cleaner aggressive look!

BMR Suspension has designed the SP317 for street performance, drag racing, and handling applications. BMR’s SP317 is available black for a durable finish, and installation time is about 2-3 hours. The lowering leaf springs in this kit are available separately without the installation hardware (SP316). As with all BMR Suspension products, the SP317 is proudly designed and made in the USA!
