

New Product Release!
BMR Suspension Lowering Springs, Set of 4, 2.0"/3.0" Drop for 2002-2009 Trailblazer

SP640 - \$359.95

FOR IMMEDIATE RELEASE

Improve the cosmetic appeal and increase the handling capabilities of your 2002-2009 Trailblazer with Lowering Springs from BMR Suspension. Manufactured from chrome silicon high-tensile spring wire, these springs are cold wound on a CNC coiling machine that can adjust the spring diameter in real time to ensure that every spring is exactly the same. These springs will lower your 2002-2009 Trailblazer 2" in the front and 3" in the rear. They feature a linear working spring rate to give you a smooth ride and great looks. BMR Lowering Springs (SP640) will lower the center of gravity and increase the cornering capabilities of your Trailblazer without sacrificing ride quality. BMR designed the SP640 springs for street performance, but will also work well for the occasional track outing. Like all BMR lowering springs, the SP640 has a LIFETIME guarantee against spring sag. Front springs (SP641) and rear springs (SP642) are also sold separately. Available in red powdercoat for long-lasting good looks. Installation time is about 3-4 hours. Proudly made in the U.S.A.!
