

FOR IMMEDIATE RELEASE

**BMR Suspension Drag Racing Lowering Springs for 2024 S650 Mustangs
SPD763 - \$259.95**

Lower your S650's center of gravity and 60-ft times with Drag Racing Lowering Springs from BMR Suspension. Manufactured from chrome silicon high-tensile spring wire, these springs are cold wound on a CNC coiling machine that can adjust the spring diameter in real time to ensure that every spring is exactly the same. These springs will lower your 2024 Mustang 7/8-inch front, 1/2-inch rear, and feature a 170 lb/in front and 800 lb/in rear linear spring rate to give you improved performance and appearance. The BMR Lowering Springs (SPD763) aid in weight transfer in an effort to lower 60-ft times, but also offer predictable handling down track. The SPD763 springs are at home on the track, but perform exceptionally on the street as well. BMR designed the SPD763 springs specifically for drag racing and street performance applications. Like all BMR lowering springs, the SPD763 has a LIFETIME guarantee against spring sag. Available in red powdercoat for long-lasting good looks. Installation time is about 3-4 hours. Proudly made in the U.S.A.!
