

FOR IMMEDIATE RELEASE

## **BMR Suspension Polyurethane Transmission/Differential Mount Kit for C6 Corvettes**

**TM560 - \$139.95**

Reduce transmission movement and improve throttle response on your 2005-2013 Corvette with a Transmission/Differential Mount Kit from BMR Suspension! Factory mounts are designed to absorb noise and vibration for a smooth ride, but do little for performance. Manufactured from 3/16-inch laser cut steel plate and 95-durometer polyurethane bushings, BMR's Polyurethane Transmission/Differential Mount Kit (TM560) offers uncompromised strength and rigidity. The TM560 drastically decreases transmission movement by replacing the factory rubber bushings with stiffer polyurethane bushings for minimal changes in NVH. BMR's Polyurethane Transmission/Diff Mount Kit also allows your Corvette's transmission to respond quicker than the factory mounts. BMR's TM560 is a direct factory replacement and therefore maintains the factory transmission height. For those looking to maximize performance without sacrificing comfort, the TM560 is the upgrade for you.

BMR Suspension designed the TM560 for street performance, drag racing, and handling applications. BMR's TM560 is available in red or black hammertone powder coat for long lasting good looks, and installation time is about 2-3 hours. As with all BMR Suspension products, the TM560 is proudly designed and made in the USA!
