

FOR IMMEDIATE RELEASE

BMR Suspension Delrin Transmission/Differential Mount Kit for C6 Corvettes

TM561 - \$159.95

Reduce transmission movement and improve throttle response on your 2005-2013 Corvette with a Delrin Transmission/Differential Mount Kit from BMR Suspension! Factory mounts are designed to absorb noise and vibration for a smooth ride, but do little for performance. Formed from 3/16-inch laser cut steel plate and Delrin bushings, BMR's Delrin Transmission/Differential Mount Kit (TM561) eliminates transmission movement by replacing the soft rubber bushings that contribute to deflection. The TM561 solid transmission mounts also allow the transmission to respond quicker than mounts with rubber or polyurethane bushings. BMR's C6 Delrin Transmission/Differential Mount Kit is a direct factory replacement and therefore maintains the factory transmission height. For those looking for the best in performance, the TM561 is the upgrade for you.

BMR Suspension designed the TM561 for street performance, drag racing, and handling applications. BMR's TM561 is available in red or black hammertone powder coat for long lasting good looks, and installation time is about 2-3 hours. As with all BMR Suspension products, the TM561 is proudly designed and made in the USA!

To preview all of BMR's high-performance suspension parts, please visit www.bmrsuspension.com, email sales@bmrsuspension.com, or contact them at BMR Suspension, 1033 Pine Chase Avenue, Lakeland, FL 33815, 813-986-9302, Fax: 813-986-8055.
