

FOR IMMEDIATE RELEASE

BMR Suspension Polyurethane Transmission/Differential Mount Kit for C7 Corvettes

TM570 - \$159.95

Reduce transmission movement and improve throttle response on your 2014-2019 Corvette with a Transmission/Differential Mount Kit from BMR Suspension! Factory mounts are designed to absorb noise and vibration for a smooth ride, but do little for performance. Formed from 3/16-inch laser cut steel plate and 95-durometer polyurethane bushings, our C7 transmission mounts offer uncompromised strength and rigidity. The BMR Polyurethane Transmission/Differential Mount Kit (TM570) drastically decreases transmission movement by replacing the soft rubber bushings with stiffer polyurethane bushings with a minor change in NVH. The TM570 Polyurethane bushings also allow the transmission to respond quicker than the factory rubber bushings. Our C7 Corvette Polyurethane Transmission/Differential Mount Kit is a direct factory replacement and includes both upper and lower mounts to maintain factory transmission height. BMR has designed the TM570 for street performance, drag racing, and handling applications. Installation time is about 2-3 hours. Available in black hammertone or red powdercoat for long-lasting good looks. Proudly made in the USA!
