

FOR IMMEDIATE RELEASE

## **BMR Suspension Delrin Transmission/Differential Mount Kit for C7 Corvettes**

**TM571 - \$189.95**

Reduce transmission movement and improve throttle response on your 2014-2019 Corvette with a Delrin Transmission/Differential Mount Kit from BMR Suspension! Factory mounts are designed to absorb noise and vibration for a smooth ride, but do little for performance. Formed from 3/16-inch laser cut steel plate and Delrin bushings, our C7 transmission mounts offer uncompromised strength and rigidity. The BMR Delrin Transmission/Differential Mount Kit (TM571) eliminates transmission movement by replacing the soft rubber bushings that contribute to deflection. The TM571 solid transmission mounts also allow the transmission to respond quicker than mounts with rubber or polyurethane bushings. Our C7 Corvette Delrin Transmission/Differential Mount Kit is a direct factory replacement and includes both upper and lower mounts to maintain factory transmission height. BMR has designed the TM571 for street performance, drag racing, and handling applications. Installation time is about 2-3 hours. Available in black hammertone or red powdercoat for long-lasting good looks. Proudly made in the USA!
