

FOR IMMEDIATE RELEASE

BMR Toe Rods, Rear, Adjustable, Poly Bushings 2008-2014 CTS-V

TR629 – 219.95

Launching harder, reducing wheel hop, and adding cornering consistency to your 2008-2014 Cadillac CTS-V is easy with adjustable lower toe rods from BMR Suspension. Stock steel toe rods with soft rubber bushings deflect under load and absorb power instead of transferring it to the tires. Manufactured from heavy-duty 1-inch, 0.219-inch wall DOM steel tubing, BMR's adjustable polyurethane toe rod (TR629) nearly eliminates all deflection. MIG-welded chrome-moly tube adapters with a center-mounted adjuster make on-car adjustments simple and easy. The TR629's heavy-duty construction and polyurethane bushings eliminate unwanted deflection while giving you much improved repeatability on the street, starting line, or in the corners. BMR has designed the TR629 to work well in street performance, drag race, and road race applications. Available in black hammertone powdercoat for long lasting good looks. Installation time is 2-3 hours. Proudly designed and made in the U.S.A from American steel!
