

FOR IMMEDIATE RELEASE

BMR Suspension Non-Adjustable Upper Control Arms for 2021-2024 Broncos

UCA1860 - \$309.95

Add durability and suspension control to your 6th Gen Bronco with upper control arms from BMR Suspension! Stock control arms with soft rubber bushings can be weak and deflect under load, making them a subpar option for when you want to improve your Bronco's performance on the street and off-roading. Designed from 1.625-inch DOM steel tubing, BMR's Non-Adjustable Upper Control Arms (UCA1860) dramatically reduce upper control arm flex and help you get better traction on the street and when off-roading. The UCA1860 utilizes high durometer polyurethane bushings to reduce deflection and minimize NVH increases on your build. These upper control arms are the perfect upgrade for those looking to increase performance and reduce upper control arm deflection.

BMR Suspension has designed the UCA1860 to improve the performance of your Bronco on the street and in off-roading applications. The UCA1860 is available in red or black hammertone powder coat for long lasting good looks, and installation time is about 1-2 hours. As with all other BMR Suspension products, the UCA1860 is proudly designed and made in the USA!
